## ***5 BUONE RAGIONI PER SCEGLIERE MEMMERT***

### **1 – Intuitive operation: touch, turn & go!**

**Fine glass and stainless steel. The elegant display has characterised Memmert lab ovens for many years now. Since the newest generation of appliances, our products have become**

### **2 – Stainless steel: precious material offering added value in the lab**

**For many years, structured stainless steel has been the unmistakable feature of Memmert ovens, incubators and climate chambers in the laboratory. Functional design in its most elegant form: scratch-resistant, hygienic, robust and durable.**

### **3 – Communication: interfaces into the wide world**

**We think that the programming of a lab oven should be possible from anywhere in the world without problems. For this reason, Memmert devices feature state-of-the-art communication interfaces.**

### **4 – Safety: of users and chamber loads**

**All Memmert lab ovens feature an electronic temperature monitoring system, a mechanical temperature limiter acc. to DIN 12880 and an integrated auto-diagnostic system with optical and acoustic alarm as a standard.**

### **5 – Service: whenever, wherever**

**The technical service of Memmert has a demanding list of tasks. Supply of spare parts, maintenance, repair and commissioning, IQ/OQ/PQ qualification, customer training and software instruction. It all comes together with global network of service partners that ensures all user queries of Memmert appliances are addressed and fulfilled.**
